MIDTERM PROJECT RUBRIC
Mobile Application Development: UI, Navigation, Presentation, and Defense

Criteria	Excellent	Good	Satisfactory	Needs Improvement	Points
1. Application Functionality & Completeness	Application works properly and all major planned features are functional. UI and navigation work together smoothly. **(20 pts)**	Most features work properly with only minor issues. **(16 pts)**	Some features work, but several parts are incomplete or have errors. **(12 pts)**	Application has major missing or non-functional features. **(8 pts)**	**20**
2. User Interface (UI) Design & Usability	UI is clean, organized, consistent, attractive, and easy to use. Proper layouts, spacing, text, buttons, colors, and components are used. **(20 pts)**	UI is generally organized and usable with minor design inconsistencies. **(16 pts)**	UI is functional but has noticeable design or usability issues. **(12 pts)**	UI is poorly organized, difficult to use, or lacks proper design. **(8 pts)**	**20**
3. Navigation & User Flow	Navigation is logical, smooth, consistent, and all required screens can be accessed correctly. Back/navigation behavior works properly. **(15 pts)**	Navigation works well with only minor issues. **(12 pts)**	Navigation works but has confusing or incomplete flows. **(9 pts)**	Navigation is broken, inconsistent, or several screens cannot be accessed properly. **(6 pts)**	**15**
4. React Native Implementation	Demonstrates appropriate use of React Native components, screen structure, navigation, props/state where appropriate, and organized project structure. **(15 pts)**	Uses React Native appropriately with minor implementation issues. **(12 pts)**	Basic React Native concepts are used but implementation has several weaknesses. **(9 pts)**	Limited understanding or inappropriate implementation of React Native concepts. **(6 pts)**	**15**
5. PPT Presentation & Project Implementation	PPT is clear, organized, visually appropriate, and effectively explains the problem, objectives, features, UI, navigation, and development process. **(10 pts)**	PPT is organized and explains most important aspects of the project. **(8 pts)**	PPT contains basic information but lacks depth or organization in some areas. **(6 pts)**	PPT is incomplete, poorly organized, or does not adequately explain the project. **(4 pts)**	**10**
6. Application Demonstration	Demonstration is well-prepared, smooth, organized, and clearly shows the application's	Demonstration is clear with only minor problems. **(8 pts)**	Demonstration shows the application but lacks preparation or misses some important parts.	Demonstration is poorly prepared or unable to properly demonstrate the application. **(4 pts)**	**10**

	major screens, features, and navigation. **(10 pts)**		**(6 pts)**		
7. Defense/Question & Answer	Members demonstrate strong understanding and confidently answer follow-up questions about the application, UI, navigation, React Native implementation, and design decisions. **(10 pts)**	Members answer most questions correctly with minor difficulty. **(8 pts)**	Members can answer basic questions but struggle with technical or project-specific questions. **(6 pts)**	Members cannot adequately explain or defend their application. **(4 pts)**	**10**
				TOTAL	**100**
